KEEP YOUR FLORIDA POOL READY FOR THE HOLIDAY SEASON!

November brings cooler temperatures, shorter days, and increased holiday gatherings. While Florida pools can be enjoyed year-round, proper maintenance during the fall helps protect your investment and ensures your pool is always ready for family and guests.

1 REMOVE LEAVES & DEBRIS REGULARLY

Fall leaves and organic debris can stain pool finishes, increase phosphate levels, promote algae growth, and restrict water circulation. Skim your pool often and empty skimmer and pump baskets to maintain proper flow.

2 MAINTAIN PROPER WATER CHEMISTRY

Cooler weather doesn't eliminate the need for balanced water. Continue testing and balancing Free Chlorine, pH, Total Alkalinity, Calcium Hardness, and Cyanuric Acid (Stabilizer). Balanced water protects your pool finish, equipment, and swimmers.

3 CLEAN YOUR FILTER BEFORE THE HOLIDAYS

A clean cartridge, DE, or sand filter keeps your pool sparkling for family gatherings and improves circulation, water clarity, and equipment efficiency.

4 PERFORM AN EQUIPMENT CHECK

Inspect your pool pump, filter, heater, salt chlorinator, automation system, valves & plumbing. Addressing minor repairs now helps prevent unexpected breakdowns during the holiday season.

5 PREPARE YOUR POOL & SPA HEATER

Cool evenings mean more families are enjoying heated pools and spas. Have your heater inspected and serviced before the busy holiday season to ensure reliable operation.

6 INSPECT OUTDOOR LIGHTING

With daylight ending earlier, test pool lights, inspect landscape lighting, verify timers are set correctly, replace burned-out bulbs, and check GFCI protection. Proper lighting enhances safety and creates a welcoming atmosphere.

COMMERCIAL POOL OWNERS

Prepare your property for holiday guests and seasonal visitors by ensuring:

- Florida Department of Health operating permit is current
- Water chemistry remains compliant
- Safety equipment is complete and accessible
- Pumps, filters, and chemical feeders are operating properly
- Gates self-close and self-latch correctly
- Depth markers and "NO DIVING" markers remain clearly visible
- Pool decks are clean and free of trip hazards

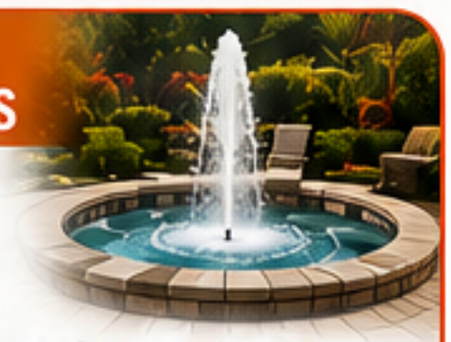

Routine preventive maintenance keeps your facility safe, compliant, and guest-ready.

RESIDENTIAL POOL OWNERS

Hosting family and friends this holiday season? Let Cooper Pools handle the maintenance so you can enjoy your backyard oasis. November is also a great time to:

- Schedule equipment upgrades
- Repair leaks
- Clean tile and remove calcium buildup
- Plan winter remodeling or resurfacing projects
- Prepare your pool for year-round enjoyment

DON'T FORGET YOUR SPA & WATER FEATURES

Spas become even more popular during cooler weather. Keep your spa, fountain, or decorative water feature performing its best by:

- Cleaning filters
- Balancing water chemistry
- Inspecting pumps and lighting
- Removing leaves and debris
- Checking plumbing for leaks
- Ensuring proper circulation
