COMMERCIAL & RESIDENTIAL
POOLS • SPAS • WATER FEATURES

KEEP YOUR FLORIDA POOL BEAUTIFUL THIS FALL!

October brings cooler evenings, lower humidity, falling leaves, and the tail end of hurricane season. While swimming season slows down for some, your pool still requires regular maintenance to remain clean, safe, and ready to enjoy.

1 REMOVE LEAVES BEFORE THEY SINK

Falling leaves and debris can stain pool surfaces, increase phosphate levels, feed algae growth, and clog skimmers and pumps. Skim your pool regularly and empty baskets frequently.

2 CONTINUE TESTING WATER WEEKLY

Even with cooler temperatures, chlorine demand changes. Maintain proper Free Chlorine, pH, Total Alkalinity, Cyanuric Acid (Stabilizer), and Calcium Hardness. Balanced water protects your finish, equipment, and swimmers.

3 CLEAN YOUR FILTER BEFORE WINTER

A clean cartridge, DE, or sand filter improves water clarity, circulation, energy efficiency, and equipment performance. Professional filter cleaning helps extend the life of your filtration system.

4 SCHEDULE AN EQUIPMENT INSPECTION

Inspect pumps, filters, heaters, salt chlorinators, automation systems, valves & plumbing, timers & electrical components. Preventive maintenance now can help avoid unexpected repairs during the cooler months.

5 TEST YOUR POOL HEATER

Planning to swim through the fall? Now is the perfect time to ensure your pool or spa heater is operating properly before cooler temperatures arrive.

6 CHECK POOL & LANDSCAPE LIGHTING

With shorter daylight hours: test underwater lights, replace burned-out bulbs, verify timers are adjusted correctly, and inspect GFCI protection. Good lighting improves both safety and the beauty of your outdoor space.

COMMERCIAL POOL OWNERS

Prepare for the busy holiday and snowbird season by ensuring:

- ✓ Florida Department of Health operating permit is current
- ✓ Water chemistry meets compliance standards
- ✓ Safety equipment is present and in good condition
- ✓ Pumps, filters, and chemical feeders operate properly
- ✓ Gates self-close and self-latch correctly
- ✓ Depth markers and "NO DIVING" markers remain visible
- ✓ Pool decks are clean and slip hazards are minimized

Preventive maintenance helps reduce downtime and keeps your facility inspection-ready.

RESIDENTIAL POOL OWNERS

Florida pools stay open year-round! October is the perfect time to:

- ✓ Schedule equipment maintenance
- ✓ Repair leaks
- ✓ Upgrade aging equipment
- ✓ Clean tile and remove calcium buildup
- ✓ Plan winter remodeling projects before the spring rush

DON'T FORGET YOUR SPA & WATER FEATURES

Cooler evenings mean increased spa use. Keep your spa, fountain, or water feature operating at its best by:

- ✓ Cleaning filters
- ✓ Balancing water chemistry
- ✓ Inspecting pumps and lighting
- ✓ Removing leaves and debris
- ✓ Checking for leaks or worn components
